The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 24 and 26 are rejected under 35 U.S.C. 102(c) as being anticipated by Heinz ('445).

In particular, Figure 10 of Heinz anticipates these claims because piston 18 is within extensible spring (48).

Claim 25 and 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 8, 10-14, 17-23, 27 and 29-33 are allowed.

Applicant's arguments filed May 4, 2003 have been fully considered but they are not persuasive. In particular, since the piston of Figures 8 and 9 is not within the bellows the rejection of the last office action has been withdrawn and this action has been made non-final. Unfortunately, claim 24 is still rejected since the piston of Figure 10 of the reference is broadly within the outer periphery of the spring.
